Night Vision

View your world from anywhere ... anytime

Y-CAM[®] Black SD

Easy to install, simple to operate, the high-performance Y-cam Black SD camera operates independently, without the need to be connected to a computer, in full colour and infrared nightvision. View and hear, in real time, from anywhere in the World, via any internet-enabled computer or phone. If any motion is detected, the camera can instantly email you a snapshot, or record the video to a microSD card. Y-cam Black SD is the ideal all-in-one surveillance & recording solution for home or business security, and can even operate outdoors using a Y-cam Shell.

Special Features of this Model

Infrared Night Vision

The Y-cam Black SD utilises 30 infrared LEDs to provide high levels of "invisible" light in dark environments. The intelligent photosensitive components can automatically turn on the LEDs in low light conditions or the user can select "moonlight view" which superimposes frames together to increase brightness.

Record direct to microSD

Using the built-in microSD card slot, the Y-cam Black SD no longer needs to be connected to a network or the internet to store streaming video or motion alerts. Use the camera anywhere, even remote locations, & store video straight to microSD card, which is then viewable in your mobile phone, via connection to a TV or PC, or view directly from the camera over WiFi.

Standard Y-cam Features

Mobile Viewing

With support for MJPEG and 3GPP the camera provides a live view for multiple platforms, including mobile devices such as the iPhone and Blackberry. The Y-cam's live stream can be viewed using any mobile phone that can play VLC-compatible streams, such as Quicktime and RealPlayer.

Wireless connectivity

Freedom to place the camera where required. With wireless wi-fi built-in (802.11b/g) connect to your camera from your wireless enabled computer, meaning there's no need for wires running around your property. Y-cam also supports WEP, WPA, WPA2 for total connection security.

Email and FTP alerts

The Y-cam comes with useful alarm tools that will keep you notified if any motion is detected. It has built-in functions that can automatically send an email to you, or upload the video or images straight to a FTP server, meaning that your data will be safely stored offsite.

PC and Mac Compatible

PC/Mac

The Y-cam SD is now fully compatible with both PC and Apple Macintosh computers across multiple web browsers. Mac users can now view live video with audio (using QuickTime), control the motion detection settings within a browser (using Adobe Flash), take snapshots from the live feed, and also record footage locally (using QuickTime Pro).

Motion Detection

If the Y-cam detects movement in its field of vision, it can automatically send an e-mail alert notifying the owner that motion has been detected, with an attached image of the scene. Unlike conventional activity detection, the Y-cam uses vector information to detect motion, therefore achieving better reliability against false alarms.

Secure Connection

Make sure your camera is secure using the Y-cams secure password authentication. Connect your camera to the internet or only on your local network, via network cable or WiFi, using powerful encryption methods such as WEP, WPA and WPA2, allowing you to be sure your cameras are only accessed by authorised users.

Specifications & Requirements

Product Code
YCB003

EAN Number
5060158900121

Camera
Image device - 1/4" CMOS
Pixels - 310,000
White Balance, Exposure, Gain - Auto
Viewing angle - Horizontal: 60°, Vertical: 45°
Focal length - f=3.6mm
Aperture - F2.0
Min illumination - 1.0 Lux (0 Lux in night vision mode)
Infrared LED - 30
Night Vision Distance* - 12-15m
Image compression - MPEG-4, MJPEG
Max frame rate - 30fps @ 640x480
Audio compression - AMR (4.75-12.2Kbps), G.726 (40/32/24/16Kbps)
Built-in microphone - Yes
SD slot - microSD card (16Mb - 8Gb)

Network
Authentication - 2 levels, up to 64 users, 16 simultaneous
Network protocols - TCP,UDP,IP,ARP,ICMP,DHCP,DNS,HTTP,FTP,SMTP,NTP,PPPoE,UPnP,DDNS
Stream type - HTTP, RTSP/RTMP/RTCP, 3GPP, ASF
Network connection - Ethernet (10BASE-T/100BASE-TX)

Wireless LAN
Wireless technology - IEEE802.11b/g
Frequency - 2.412-2.462GHz
Transmission speed - Auto Switch up to 54Mbps
Security - WEP (64/128 bit), WPA-PSK (AES/TKIP), WPA2-PSK (AES/TKIP)

General
Power requirements - DC 5V
Power consumption - 3.75W
Operating temperature - -5 to +45°C (-22 to +113°F)
Storage temperature - -20 to +60°C (-4 to +140°F)
Operating humidity - 20-80%RH (Non-condensing)
Storage humidity - 20-95%RH (Non-condensing)
Dimensions (W x D x H) - 85mm x 85mm x 30mm
Weight - 150g (Main Body)
Supplied accessories - AC Adaptor (x1), Quick Start Guide (x1), CD-ROM inc. Setup Software & User Manual (x1), Stand (x1), Network Cable (x1)

Minimum PC System Requirements
Operating system - Windows 2000/XP/Vista/Windows 7
Processor - Intel Pentium III, 1GHz
Memory - 256Mb RAM

Minimum Mac System Requirements
Operating system - Mac OS X 10.4 (Tiger)
Processor - 800MHz - PowerPC G4 or Intel
Memory - 128Mb RAM (256Mb recommended)

Viewing System Requirements
Web Browser Setup/Viewing - Microsoft Internet Explorer version 5.5 or later, Mozilla Firefox, Google Chrome, Safari & most other browsers.
Mobile Phone Viewing - 3GPP player, VLC, Real Player, QuickTime and most other VLC players. Y-cam Mobile Live Images feed can be viewed via most internet enabled devices.

Other Requirements
Broadband connection with at least 128kb/s upload recommended for Internet viewing.
This Y-cam is for indoor use only (unless used with the Y-cam Shell external housing unit).

Compatible Systems

Compatible With

Y-CAM[®] Shell Black

Y-CAM[®] Shell White

Other Y-cam Products

Y-CAM[®] Bullet

Y-CAM[®] Knight SD

Y-CAM[®] White SD
