# Y-CAM<sup>®</sup> Bullet

Easy to install, simple to operate, the high-performance Y-cam Bullet camera operates independently, without the need to be connected to a computer, in full colour and infrared nightvision. View and hear, in real time, from anywhere in the world, via any internet-enabled computer or phone. If any motion is detected, the camera can instantly email you a snapshot, or record the video to a microSD card.

The Y-cam Bullet also includes professional features designed for industrial and business applications – fully weatherproofed, IR-cut filter for true/day night operation, 2-way audio, PoE, WiFi and includes a sun visor for maximum clarity of vision.

The Y-cam Bullet is also available in Black (YCBLB3)

## Specifications & Requirements

Product Code - YCBL03

EAN Number - 5060158900145

### Camera

Image device - 1/4" CMOS  
Pixels - 310,000  
White Balance, Exposure, Gain - Auto  
Viewing angle - Horizontal: 50°, Vertical: 40°  
Focal length - f=4.3mm  
Aperture - F2.0  
Min illumination - 1.0 Lux (0 Lux in night vision mode)  
Infrared LED - 12  
Night Vision Distance - 15m  
IR Cut Filter - Yes  
Image compression - MPEG-4, MJPEG  
Max frame rate - 30fps @ 640x480  
Audio compression - AMR (4.75-12.2Kbps), G.726 (40/32/24/16Kbps)  
Built-in microphone - Electret Condenser Microphone

### Network

Authentication - 2 levels, up to 64 users, 16 simultaneous  
Network protocols - TCP, UDP, IP, ARP, ICMP, DHCP, DNS, HTTP, FTP, SMTP, NTP, PPPoE, UPnP, DDNS  
Stream type - HTTP, RTSP/RTMP/RTCP, 3GPP, ASF  
Network connection - Ethernet (10BASE-T/100BASE-TX)  
Power over Ethernet (PoE) - 802.3af

### Wireless LAN

Wireless technology - IEEE802.11b/g  
Frequency - 2.412-2.462GHz  
Transmission speed - Auto Switch up to 54Mbps  
Security - WEP (64/128 bit), WPA-PSK (AES/TKIP), WPA2-PSK (AES/TKIP)

### External Ports

Audio Output (2 way audio) - Yes  
SD slot - microSD card (16Gb - 8Gb)  
Digital I/O - 1 input, 1 output

### General

Power requirements - DC 12V  
Power consumption - 4.5W  
Operating temperature - -5 to +45°C (+22 to +113°F)  
Storage temperature - -20 to +60°C (-4 to +140°F)  
Operating humidity - 20-80%RH (Non-condensing)  
Storage humidity - 20-95%RH (Non-condensing)  
Dimensions (D x H) - 70mm x 190mm  
Weight - 700g (Main Body)  
Supplied accessories - AC Adaptor (x1), Quick Start Guide (x1), CD-ROM inc. Setup Software & User Manual (x1), Stand (x1), Network Cable (x1), Sun Shield (x1)

### Minimum PC System Requirements

Operating system - Windows 2000/XP/Vista/Windows 7  
Processor - Intel Pentium III, 1GHz  
Memory - 256Mb RAM

### Minimum Mac System Requirements

Operating system - Mac OSX 10.4 (Tiger)  
Processor - 800MHz - PowerPC G4 or Intel  
Memory - 128Mb RAM (256Mb recommended)

### Viewing System Requirements

Web Browser Setup/Viewing - Microsoft Internet Explorer version 5.5 or later, Mozilla Firefox, Google Chrome, Safari & most other browsers.  
Mobile Phone Viewing - 3GPP player, VLC, Real Player, QuickTime and most other VLC players. Y-cam mobile live images feed can be viewed via most internet enabled devices.

### Other Requirements

Broadband connection with at least 128kb/s upload recommended for Internet viewing.  
The Y-cam Bullet is designed for indoor or outdoor use and is weatherproof to IP66 standard.

## Compatible Systems

## Special Features of this Model

### Infrared Night Vision

The Y-cam Bullet utilises 12 infrared LEDs to provide high levels of "invisible" light in dark environments. The intelligent photosensitive components can automatically turn on the LEDs in low light conditions or the user can select "moonlight view" which superimposes frames together to increase brightness.

### True Day/Night Picture

Using an Infrared Cut Filter, the Bullet produces true day and night quality images. Infrared light is filtered during day time operation to produce true colour representation of the image. During night time operation the filter is removed to allow the camera to make full use of its night vision capabilities.

### Weatherproof

The Bullet is the first true outdoor camera from Y-cam - its fully waterproof, has shielded cables and seals to ensure smooth operation, and is IP66-rated.

### Professional Connectors

The Y-cam Bullet comes complete with Power over Ethernet allowing you to transmit data and power over a single cable, a Digital I/O for systems integration, and 2-way audio\* capability (provided by a built-in microphone and audio out connector) allowing you to remotely talk to anyone at your cameras site.

### Record direct to microSD

Using the on-camera microSD card slot, the Y-cam Bullet no longer needs to be connected to a network or the internet to store streaming video or motion alerts. Use the camera anywhere, even remote locations, & store video straight to microSD card, which is then viewable in your mobile phone, via connection to a TV or PC, or view footage directly from the camera over WiFi.

## Standard Y-cam Features

### Mobile Viewing

With support for MJPEG and 3GPP the camera provides a live view for multiple platforms, including mobile devices such as the iPhone and Blackberry. The Y-cam's live stream can be viewed using any mobile phone that can play VLC-compatible streams, such as Quicktime and RealPlayer.

### Secure Wireless connectivity

Freedom to place the camera where required. With wireless wi-fi built-in (802.11b/g) connect to your camera from your wireless enabled computer, meaning there's no need for wires running around your property. Y-cam also supports WEP, WPA, WPA2 for total connection security, and utilises secure password authentication allowing you to be sure your cameras are only accessed by authorised users.

### Email and FTP alerts

The Y-cam comes with useful alarm tools that will keep you notified if any motion is detected. It has built-in functions that can automatically send an email to you, or upload the video or images straight to a FTP server, meaning that your data will be safely stored offsite.

### PC and Mac Compatible

PC/Mac

The Y-cam Bullet is compatible with both PC and Apple Macintosh computers across multiple web browsers. Mac users can view live video with audio (using QuickTime), control the motion detection settings within a browser (using Adobe Flash), take snapshots from the live feed, and also record footage locally (using QuickTime Pro).

### Motion Detection

If the Y-cam detects movement in its field of vision, it can automatically send an e-mail alert notifying the owner that motion has been detected, with an attached image of the scene. Unlike conventional activity detection, the Y-cam uses vector information to detect motion, therefore achieving better reliability against false alarms.
